Log Splitters

PRODUCT CATALOG

The BOSS Advantage

Less Down Time

A weak hydraulic system can render a log splitter useless. Boss Industrial's rugged hydraulic system is built using superior quality materials combined with state of the art engineering. That means less down time and greater productivity.

Greater Value

Stronger log trays, powerful engines and superior hydraulic control systems are all features that are built into the design of our log splitters. The result is a longer life and greater value for your money.

Safety & Portability

Lugging around heavy log splitting equipment can take its toll and cause back problems. Our log splitters maximize ergonomics and portability through conveniently located handles, larger wheels, and optional accessories. Extra wide log trays, one hand operation, and our patented valve protector, improve user performance and safety.

Poorly engineered designs can lead to dangerous situations. That's why all of Boss Industrial's gasoline log splitters feature full-beam design, thereby eliminating the failures that result from the stress put on half-beam units.

Superior Engineering and Greater Dependability

In order to exceed industry standards, Boss Industrial works with third party testing organizations to ensure overall product safety. Our products are listed with CSA, one of the oldest and most prestigious testing organizations in the world. We also maintain CE compliance for our European customers.

Extended Warranty

Boss Industrial products come with a warranty that surpasses any guarantee in the industry. We promise to repair or replace any part of a product that proves to be defective in workmanship or materials for a period of 2 years from the date of purchase for residential use and 180 days for commercial or rental use.

Electric Log Splitter

5 TON

EC5T20

On demand performance. This splitter is perfect for smaller log-splitting applications.

- 5 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Automatic Ram Return
- Extra Wide Log Trays
- Motor: 115V, 1.8 HP
- Net Weight: 105 lbs

7 TON

ES7T20

Our hallmark model for home and farm use. Get the job done in half the time with our automatic ram return system.

- 7 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Automatic Ram Return
- Motor: 115V, 2 HP
- Net Weight: 121 lbs

8 TON

ED8T20

Tough and dependable. This log splitter features a dual-action splitting ram that can increase splitting efficiency.

- 8 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Dual Direction Splitting
- 3 Position Control
- Motor: 115v, 2 HP
- Net Weight: 167 lbs

10 TON

ED10T20

Best in show. With a whopping 10 tons of force, this is the ultimate electric portable log splitter.

- 10 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Dual Direction Splitting
- 3 Position Control
- Extra Wide Log Trays
- Built-in Stand
- Motor: 115v, 2.5 HP
- 20 Amp Circuit Required
- Net Weight: 214 lbs

GD13T21

Dual action, 4 second per split, our "Speedy" machine has the compact design with plenty of power, the best choice for heavier jobs at home or on small farms.

- 13 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Dual Direction Splitting
- 3 Position Control
- Extra Wide Log Trays
- Built-in Wheeled Trailer Jack
- Net Weight: 315 lbs

13 TON

GD16T21

The perfect combination of speed and power to handle the tough projects.

- 16 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 20.5"
- Dual Direction Splitting
- 3 Position Control
- Extra Wide Log Trays
- Built-in Wheeled Trailer Jack
- Net Weight: 342 lbs

16 TON

GD20T24

Combining the best dual action log splitter features such as compact design and efficiency, this unit performs incredible power as the commercial level log splitters.

- 20 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 24"
- Dual Direction Splitting
- 3 Position Control
- Extra Large Log Trays
- Built-in Wheeled Trailer Jack
- Net Weight: 449 lbs

20 TON

Log Splitter

GB22T25 / GB22T25L

Made to endure heavy use on the farm or at home, this unit is ready to split wood for years to come. Horizontal & vertical positions meet the needs of different log splitting jobs.

- 22 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 25"
- 3 Position Control
- Automatic Return
- Net Weight: 497 / 499 lbs

GB28T25 / GB28T25L

Rugged and durable, this all purpose 28 ton unit has the versatility and strength to tackle almost any log splitting job.

- 28 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 25"
- 3 Position Control
- Automatic Return
- Net Weight: 515 / 517 lbs

28 TON

GB34T25 / GB34T25L

The monster. Our heavy duty 34 ton unit is built to split the toughest wood.

- 34 Tons of Splitting Force
- One Hand Operation
- Max Splitting Length: 25"
- 3 Position Control
- Automatic Return
- Net Weight: 572 / 574 lbs

34 TON

Advantages of GB Series:

- Engine options available for quantity orders: Kohler, B&S, BOSS, etc.
- Patented mechanical pressure release device improves valve performance and safety
- Rugged steel full beam design
- Built-in extra large log trays
- Optional rear lights

3 Point Hitch Log Splitter

3PT13T21/3PT16T21

On demand dual action performance. These two 3 Point Hitch log splitters are perfect for smaller applications.

- 13/16 Ton design, tractor dependant
- One Hand Operation
- Max Splitting Length: 20.5"
- Dual Direction Splitting
- 3 Position Control
- Extra Wide Log Trays
- Net Weight: 199/224 lbs

3PT20T24

Dual action with a whopping of 20 tons of force, this 3 Point Hitch log splitter handles almost any log splitting job on the farm.

- 20 Ton design, tractor dependant
- One Hand Operation
- Max Splitting Length: 24"
- Dual Direction Splitting
- 3 Position Control
- Extra Wide Log Trays
- Net Weight: 353 lbs

3PT22T25/3PT28T25/3PT34T25

Tough and dependable, these three monsters, equipped with our patented valve protector, utilize the full power of your Cat 1 or Cat 2 tractor.

- 22/28/34 Ton design, tractor dependant
- One Hand Operation
- Max Splitting Length: 25"
- Horizontal/Vertical Splitting
- 3 Position Control
- Automatic Return
- Extra Large Log Trays
- Net Weight: 440/458/488 lbs
