DESCRIPTION

The DK2 Universal T-Frame Mounted Snow Plows allow you to quickly and effectively remove snow from your driveway or small parking lot. These plows simply slide into a 2" front mount receiver for easy removal and storage.

Each snow plow ships in a single carton complete with hardened steel cutting edge scraper, rubber snow deflector, polymer-wrapped wire rope plow markers, skid shoes, castor kit for easy storage, and a wireless electric actuator for extra strength and reliability versus the winch-driven standard series. Each plow kit will also include a set of blade stiffeners for added strength by creating a 3 point connection.

ACTUATOR BENEFITS

Smoother operation, better control, with a built-in clutch to protect your snow plow blade. Actuators use a strong chain to lift your plow while using less amperage than the winch, extending the life of your solenoid. Built with a completely sealed gearbox and housing - IP67 dust and water rating.
